A disciplined IT student pursuing a degree in Informatics with practical experience in web development. Proficient in modern frontend frameworks including React.js, and Svelte, complemented by backend exposure to Laravel and MySQL. Skilled in UI/UX implementation using Tailwind CSS and Figma, with additional familiarity in mobile development via Android Studio. Dedicated to building responsive, user-centric web solutions through clean code and efficient workflows. Continuously expanding expertise in JavaScript ecosystem tools and component-driven design. Eager to contribute to impactful projects through internships or collaborative development roles.

EDUCATION

Universitas Multimedia Nusantara - Tangerang, Indonesia (Aug 2022 - Present)
Bachelor of Informatics, 3.7/4.00

WORK EXPERIENCE

Freelance Helper - PT. Nusantara Compnet Integrator (12 Oct 2023 - 13 Oct 2023)

- Assisted in mobilizing five Smart TVs per day with a team of four, carrying them via stairs to the second floor of Gedung Wanita Patra Pertamina Simprug and Pertamina Simprug Residence to support presentation activities. Ensured safe and efficient handling throughout the process.

Freelance Technician - PT. Nusantara Compnet Integrator (16 Dec 2024 - 17 Dec 2024)

- Performed reimaging and cloning of 341 Zyrex laptops using Macrium Reflect 7 software with 5 SSDs for a BNI employee laptop procurement project. Ensured efficient, consistent deployment and system readiness across all devices within the project timeline.

Full Stack Developer Internship - Pusat Pengembangan Kepegawaian ASN BKN (31 Jan 2025 - 25 June 2025)

- Currently interning as a Full Stack Developer at the Information Systems Working Group, Pusat Pengembangan Kepegawaian ASN BKN, where I am developing JAKASN, a customized web-based platform that integrates Open Journal Systems (OJS) with a redesigned user interface to improve accessibility and align with institutional branding. My responsibilities include modifying the front-end appearance using HTML, CSS, and JavaScript, and handling system integration on the back-end with PHP and MySQL, ensuring the platform delivers a seamless user experience and supports the organization's digital publication initiatives.

Full Stack Developer & WordPress Specialist Intern - PT. Gajah Terbang Kreatif (28 Juli 2025 - Present)

Currently developing a modern HR software platform (GodPlan) using TypeScript, Next.js, Go, and PostgreSQL. Responsible for building core features like authentication, employee management, attendance, and leave systems, while ensuring scalable backend architecture, clean code, and smooth user experience. Actively collaborating with design and product teams to turn business requirements and Figma prototypes into reliable, user-friendly workflows. Also experienced with PHP-based WordPress development, occasionally combining JavaScript and Tailwind CSS for enhanced UI when needed.

ORGANIZATIONAL EXPERIENCE

Security Division PPIF UMN - Universitas Multimedia Nusantara (Feb 2024 - Agustus 2024)

-Designed and implemented pathways, seating arrangements, and event flows to ensure smooth and safe participation for new students. Developed teamwork and communication skills by working efficiently and maintaining focus to create a well-organized and secure event environment.ss

Member UMN Programming Club - Universitas Multimedia Nusantara (Oct 2024 – Juni 2025)

-Learned C++ for competitive programming through collaboration and team discussions to solve complex problems. Participated in UMNPC, which required competing in C++ case study competitions to develop problem-solving and analytical skills under pressure.

LANGUAGE SKILLS
